2. CITATIONS AND EXPLANATIONS

Please See Continuation Sheet

Supplemental Box

(To be used when the space in any of the preceding boxes is not sufficient)

Claim 2 lacks an inventive step under PCT Article 33(3) as being obvious over the prior art as applied in the immediately preceding paragraph and further in view of Swanson et al.

With respect to claim 2, Koelfgen and Briggs fail to specify a depth filter medium. Swanson et al discloses a depth filter medium and suggests that such a medium is capable of providing secondary filtration of oil of a diesel engine. It would have been obvious to have modified the combination suggested by Koelfgen and Briggs so as to have included a depth filter medium as suggested by Swanson et al in order to provide secondary filtration for a diesel engine.

Claims 8-13, and 15 meet the criteria set out in PCT Article 33(2)-(3), because the prior art does not teach or fairly suggest: The limitation of the flanges having a boss on an outside surface of each of the flanges as recited in claims 8, 10, 12, 13, and 15;

The limitation of the flanges having a groove on the lower surface of the flanges as recited in claims 9 and 11.

Claims 1-17 the criteria set out in PCT Article 33(4), and thus have industrial applicability because the subject matter claimed can be made or used in industry.
